University Task Force on Graduate Education Governance Charge:

To articulate recommendations to the provost as to graduate education governance at UL Lafayette. In particular, to identify the role of the Graduate Council, and to offer recommendations to improve its ability to represent the graduate faculty and graduate degree programs better. Also, to identify the best leadership model for the Graduate School, and to offer recommendations as to the role of this leader. And, ultimately, to identify the goals and mission of the Graduate School. The recommendations of this Task Force will provide a broad context within which policy decisions regarding graduate education can be made.
